HOME SAFE

Specification

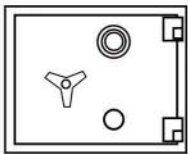

- Body
- : 51 mm thick. Made of steel plate welded inside and outside become one entity and contains a protective layer CS350.
- Door
- : 74 mm thick. Consists of a protective layer Solid Steel Plates 8 mm thick. Locking and home fireproof Panel thickness of 15 mm at the rear door. In the locking area is equipped with a drill-resistant steel plate and around the door is equipped with a "Fire Seal" which will expand and close the gap between the door and body in the event of a fire.
- Key
- : Sargent & Greenleaf combination lock (S & G, made in USA) 1,000,000 variation 3 wheel with code. Certification: UL Group 2, Vds Class 1, CEN A.
Mauer key lock key (Made in Germany) 8 lever double bit. Certification: UL 437, Vds Class 1, EN 1300A.
- Locking System
- : Reinforced doors to the body with a diameter of 22 mm Steel Bolt on the front side and dogging bar on the side of the hinge that provides protection if the hinges are cut or damaged so that the door will not open.

Why CASSA ?

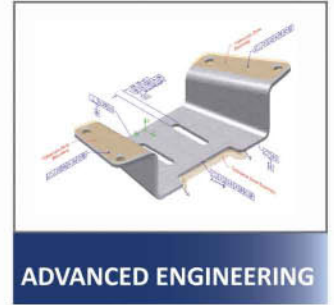

FIRE-PROOF

STRONGEST ARMOR

MAX-SECURITY LOCKS

ADVANCED ENGINEERING

Each CASSA coated fire safe door seal. When the fire seals exposed to heat, it expands, thus closing the gap between the wall and the door safes. This prevents the hot air into the safe through the gap.

Safe CASSA is protected by a hard-alloy casting special plate, which has a high resistance over drilling and oxy-acetylene welding. Safe CASSA also coated high quality steel which has high resistance to bending moment, which provide maximum protection to demolition

CASSA only use the best keywords. We use a combination lock brands S&G of Americans with high-precision and double-bit key lock brands Mauer of Germany which is not easily duplicated.

Reinforced with relocking device system in case of forcible demolition or blasting, then 2 pieces behind the automatic safety lock combination will work automatically and the door remains locked even if two keys have been open.

Testing of Fire Resistant Safe Certificate

Fuel Safe has been tested for 2 hours with a temperature of 922.6 °C, and the temperature in the safe convey only 104.1 °C, while the maximum allowable temperature is 177 °C.

CASSA proven product quality is the best.

SERTIFIKAT PENGUJIAN
No. 28010-TRASSISTVIB

I. PENDAHULUAN

1.1. Pengirim Contoh : PT. CITRA SAKTI SARANA ABADI
1.2. Alamat : Jl. Arah Pajenean, Cileunyi, Bandung 40132
1.3. Contoh diterima : 23 Juli 2007
1.4. Ukuran Benda Uji : Dimensi luar = tinggi 772 mm x lebar 521 mm x dalam 500 mm
1.5. Tanggal Pengujian : 23 Juli 2007
1.6. Jenis Pengujian : Uji Ketahanan Api
1.7. Standar Pengujian : SNI 12 - 1393 - 1999

II. HASIL PENGUJIAN

Deskripsi Benda Uji	Waktunya pengujian dalam menit	Temperatur maksimum di dalam lemari yang diuji	Temperatur maksimum yang diperbolehkan	Klasifikasi
Lemari besi pintu tunggal 2 (dua) laci type document safe merek CASSA dengan tebal bahan api DS-950 tebal 98 mm	120 menit	104.1 °C	≤ 177 °C	TA-2

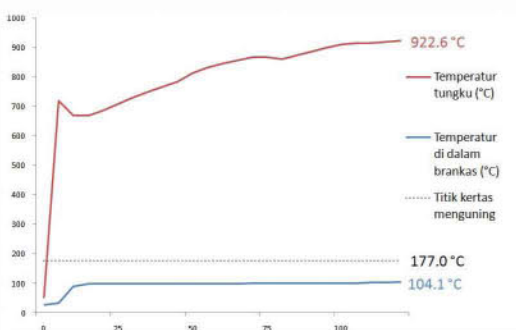

III. KESIMPULAN

Hasil uji lemari besi merek "CASSA" type document safe 2 laci produk PT. CITRA SAKTI SARANA ABADI memenuhi klasifikasi TA-2.

Keterangan :

- TA-2 artinya Ketahanan Api lemari besi (lemari) untuk digunakan menyimpan kertas dokumen selama 120 menit. Temperatur tungku rata-rata 922.6 °C.
- Hasil uji secara lengkap dapat dilihat pada lampiran.
- Hasil uji ini hanya berlaku untuk jenis uji dan kualitas bahan yang sama, dari contoh uji yang diterima.

The CASSA Safe

Secure Combination Lock, USA

We use the highest grade combination locks available to ensure maximum reliability and security. Made in USA.

Secure Digital Lock, USA

We offer an optional UL Listed Type 1 digital lock. The digital lock comes with one master code, eight user codes, and a penalty time feature to prevent opening by entering random codes until a valid code is found. The lock can be programmed to open with a 9-minutes time delay. Made in USA.

8 Lever Double Bit Key Lock, Germany

A secondary key lock comes with every CASSA Safe to provide a second layer of access control. Due to our key's geometry, it can only be duplicated with special tooling and highly trained personnels. Made in Germany.

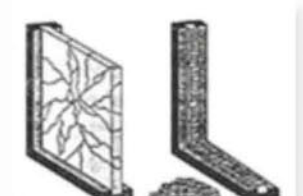

Fire Seal, Australia

Every CASSA safe is lined with a fire seal that expands to seal the gap between the door and the body in the event of a fire. Made in Australia.

Re-locking Mechanism

A re-locking mechanism detects any forced attempts to open the safe by drilling or torch-welding and engages a permanent locking system.

TESTIMONIAL

● PT FEDERAL INTERNATIONAL FINANCE

" With this we say that the products of PT Pertiwi Agung Persindo we use the Document Safe brand CASSA type DS7 has a good quality it has been tested in the fires of our branch office on March 13, 2011.

In the event the entire building and its contents were burned, including the safe document. Once the fire is out, we were worried that we document can not be saved anymore, apparently after his condition really cool and we open the safe document of our documents are in good condition without any damage.

So that we can deliver, with the above incident we are more confident and believe in the quality of goods produced CASSA. "

Vivi Andriani, General Services Dept. Head

FACT FIRE INCIDENT

Date of Incident	: March 13, 2011
Type Safes	: Document Safe DS-7 Laci Khusus BPKB
Doods are stored in a safe	: 5.600 BPKB

● PT RAMAYANA LESTARI SENTOSA, Tbk

" In connection with a fire at one of our stores in the mall Department Ciledug Tangerang on the 11th of November 2014 in which iron lebari CASSA Brands that we use to save money from the sale were also burned.

Once the vault is successful we open 2 days later, we found money and other items stored in the cabinets are all still intact as before.

With the above incident, we believe and are sure top quality brands CASSA vault.

We gratefully acknowledge the assistance and services that have been provided. "

Hin Tjoeng, Head of Public

FACT FIRE INCIDENT

Date of Incident	: November 11, 2004
Type Safes	: Brankas CASSA type Conqueror size 2
Doods are stored in a safe	: Money and Documents

● PT SINAR GAJAH PERMAI
